

Job Title: Trading Operations Analyst (Equities & FX), OneChronos Markets

Location: London or Amsterdam (Hybrid)

About the Role

OneChronos Markets is seeking a Trading Operations Analyst to join our team in either London or Amsterdam. This hybrid role is ideal for someone with 1–3+ years of experience in financial markets who is eager to deepen their expertise in electronic trading, market infrastructure, and trading technology.

As a member of our European Multilateral Trading Facility (MTF) operations team, you'll help ensure the smooth day-to-day operation of our trading platform across equities and FX markets. You'll be responsible for managing platform performance, supporting client onboarding and connectivity, and contributing to automation, innovation, and data-driven improvements.

This is a great opportunity for someone excited to work at the crossroads of trading, technology, and operations within a fast-paced, collaborative environment.

What You'll Do

Client Support & Onboarding

- Manage the technical onboarding of clients, including account setup and FIX connectivity.
- Guide clients through testing and certification processes, ensuring compliance with trading rules.
- Troubleshoot connectivity and trading issues, collaborating with internal engineering teams as needed.

Trading & Platform Operations

- Monitor live trading activity and platform health across European equities and FX.

- Ensure accuracy in market data, trade lifecycle events, and session management.
- Build tools and scripts (e.g., in Python or SQL) to automate operational checks, diagnostics, and reporting.

Regulatory & Compliance Support

- Ensure operational processes adhere to MiFID II and other relevant UK & European trading regulations.
- Monitor trade reporting obligations and support regulatory inquiries as needed.
- Assist in reconciling post-trade workflows and market surveillance functions.

Automation, Innovation & Analytics

- Help identify and automate manual processes using scripting and monitoring tools.
- Analyze trading and operational data to find patterns, optimize workflows, and improve performance.
- Collaborate with engineering and product teams to implement enhancements and new tools.

What We're Looking For

- 1–3+ years of experience in trading operations, client services, or technical operations within a trading venue, MTF, or financial institution.
- Familiarity with the European equities and FX trading landscape, FIX protocol, and trade lifecycle processes.
- Proficiency in Python or SQL; experience with monitoring tools such as Grafana is a plus.
- Strong analytical and problem-solving skills, especially in time-sensitive environments.
- Clear and effective communication skills across technical and non-technical teams.
- A proactive, detail-oriented mindset with a passion for automation, data analysis, and continuous improvement.
